

1069 Beach Drive  
The Mrs. David M. Rogers House  
Built 1912  
Architect: Jas. Finmore

David Rogers was President of Rogers and Co. Ltd., a Real Estate firm, as well as being president of The Uplands Ltd. The house, a substantial stone dwelling, made the most of the fine sea views with large windows, terraces and balconies facing the ocean. Archival photographs of the original interior show Arts and Crafts panelling and a panelled ceiling in the dining room. The interiors were extensively altered in 1960. The windows have also been replaced. A stone garage and large stone wall with gates define the perimeter of the property which today features lavish plantings that are often the subject of tourists' cameras.
